The .32 Calibre. The .38 Calibre. The .44 Calibre.

WINCHESTER, MODEL 1886.

This Gun is adapted to the .45-70 Government Cartridges of our make, with 405 or 500 grain bullet, and to 50-110-300, .45-90-300, .40-82-260, .40-65-260, or .38-56-255 Cartridges, especially made for it.

The system is a new one, as shown in the cuts. It is manipulated, like the Winchester, by a finger lever. This part has a short movement, enabling easy and rapid firing of the gun from the shoulder. The gun is locked by two bolts, having a motion like the old Sharp's breech-block which show on the top of the gun when it is closed. In this position the locking bolts lie one on each side of the breech-bolt, each fitting into its slot in the frame on the one side, and into a similar slot in the breech-bolt on the other. A glance at the gun will convince anyone that this is a most simple and solid looking device.

WINCHESTER .22 CALIBRE REPEATING RIFLE,

MODEL 1890.

The system is a new one, with sliding forearm movement, and is well adapted to small cartridges. The breech-block locks itself in plain view, and is of such size as to permit a strong firing-pin and extractor, and offer a good cover to the head of the cartridge. The gun locks at each closing movement, and cannot be opened except by letting down the hammer or pushing forward the firing-pin. The parts are few, and are strong and made interchangeable.

The arrangement of breech-block and hammer is such that the gun cannot be prematurely fired, nor can the hammer be pulled prematurely, causing misfire.

The method of loading the magazine is, we think, the best that can be devised. Many experiments have convinced us that cartridges as small as the .22 short cannot be easily loaded into the magazine when pushed against the pressure of the magazine spring. They are too small to be firmly held after the fingers and cartridges have become greasy, as they necessarily must in handling this kind of a cartridge.

The sliding forearm movement we believe to be particularly applicable to a gun handling this size cartridge, where little power is required to put the cartridge into the chamber.

We feel sure that this gun will be found to be always serviceable, and that the action will require no care to keep it in order, nor will the action need any cleaning.

In calibres as small as the 22 short, too much care cannot be expended in keeping the barrel clean.

Rifles of this model will be adapted to the regular .22 short, 22 long and .22 Winchester fire-rim cartridges (the latter being especially designed for this gun, with inside lubricated bullet).

Guns will be furnished only with 24-inch octagon barrels, plain triggers and straight grip, rifle stocks. We are not prepared to furnish longer barrels, set triggers or pistol grip stocks.

Price List of Winchester Repeating Rifle, Model 1890, .22 Calibre.

	Factory Price.	Selling Price.

WINCHESTER RIFLE.

EXTRAS.

All deviations from standard styles and sizes involve a large proportional outlay for hand labor, and, when ordered, will be subject to the following charges:

For additional length of barrel and magazine on Repeating Rifles, add to price $1 00 per inch over the regular lengths, as quoted in preceding pages.

Barrels cannot be furnished longer than 36 inches.

Extra heavy barrels on Repeating Rifles, round or octagon, increasing the weight of the gun from one to two pounds, can be furnished at an additional cost of $4 00.

Butt-stocks of special shape, involving change in either length or drop from standard, $10 00.

Engraving, from $5 to $100 additional, according to style and quality.

Carbine 20 in. 6 " 12 "	17 50	13 00

This Rifle has the improved cross-bolt in the breech, making it absolutely safe and secure from all accidents. The movement of the lever in closing the Gun throws the cartridge into the chamber, thus avoiding carrying two cartridges into the receiver at once, which occurs sometimes with other movements. The working of it is the smoothest and easiest of any Gun now made; the short stroke of the lever enables it to be loaded and shot readily, without removing it from the shoulder. The working parts contain about one-half as many pieces as any Gun now made, thus insuring great service; and the high reputation of the Marlin Works, as to shooting qualities and service, makes this decidedly the best Gun now made.

THE MARLIN SAFETY REPEATING RIFLE, MODEL 1891.

The [illegible] making a strong and durable arm, and manufacturers have often tried to [illegible] the cheap rim fire 22 caliber ammunition. We believe that the Marlin Safety [illegible] 1891, is the first to fully meet the popular want.

[illegible] designed for short range target work, both as a source of recreation and as a means of perfecting [illegible]; also for snap shooting on the wing, and for hunting small game. We also recommend it [illegible] With the magazine extending to the end of the fore-arm, and holding 10 short cartridges, it will be found the thing for a gallery gun.

The Marlin Safety Rifle, without any adjustment, may be used any or all of the following well-known rim-fire cartridges: *22 Short, 22 Long, 22 Long Rifle, and 22-50 Shot.* Of these Cartridges the 22 short gives good results at distances less than 125 feet. The 22 long gives fair results at distances less than 150 feet. The 22 long rifle gives excellent results up to 200 yards. The 22-50 shot is of the same length as the 22 long rifle loaded with dust shot. It gives a good target at 30 feet All of these cartridges are cheap and can be procured everywhere. C. B. C's and B. B. C's are loaded with fulminate, which contains glass, and they will ruin a rifle barrel in a short time.

The [illegible] is operated by a finger lever and any one using this system for home practice will find such practice to be a great help instead of a positive dotriment, when he goes into the woods with his larger rifle and finds himself in the presence of game or danger. The throw of the lever is very short and the motion remarkably easy. The solid top and side ejecting principle, so successfully introduced in our Model of 1889, is retained in this arm and is of very great importance, because rim-fire cartridges are very frequently discharged. A slight squeezing of any part of the rim is all that is necessary to explode them. Such explosions are neither dangerous nor disagreeable on a Solid Top Gun.

Our loading device consists of only one piece—a spring cover. It will not get out of order and is not a dirt trap. It is the easiest gun to load we have ever seen.

The two greatest difficulties in the way of making a 22 calibre Magazine Rifle are brought about because the ammunition is lubricated on the outside of the bullets and because the shells are not firmly crimped onto the bullets. Lubricating on the inside makes the ammunition expensive. Crimping the shell makes it less accurate. From the first condition it results that when the arm is heated the lubricantl melts and unites with the burnt powder and penetrates every recess of the action, hardening as the arm cools. After using a few days, "The gun works hard;" the action must be cleaned. From the second conditon it sometimes results that the cartridge breaks in two in the action and the shell and bullet are jammed in all manner of ways, completely locking the arm. In order to counteract as much as possible these objectionable features we introduce our greatest improvement, a removable side; an entirely new feature and ons which will be of great practical value.

The unscrewing of the thumb screw on the right hand side of the action allows the entire side of the receiver to be removed, and also, in turn, the carrier block, finger lever and breech bolt. From the breech bolt may be taken the firing pin and extractor; all this without any tools whatever and with the lever in any position. This allows the action to be thoroughly cleaned without trouble or tools, and allows the barrel to be wiped out from the breech, which is very desirable in a small bore gun; and if the action becomes clogged, one minute is time sufficient to open the gun and remove the obstruction.

No. 3. BALLARD GALLERY RIFLE.

Octagon Barrel, using 22-cal. rim fire, long or short cartridges, and ball caps. Can also be chambered for the "extra long" cartridges for 50 cents extra. For shooting galleries, target and home practice. A 22-calibre Rifle is the most difficult to make to shoot with positive accuracy. We have overcome all the difficulties, and the Ballard Gallery is without question superior to any other gun of that size.

COLT'S NEW LIGHTNING RIFLE.

SPORTING RIFLE, OCTAGON BARREL.

Sizes 32, 38 and 44 Center Fire.

	Factory Price.	Selling Price.
26-inch Barrel, weight 7¼ lbs., number of shots 15	$18 00	$15 00
26 " Round Barrel, weight 6¾ lbs., number of shots 15	16 50	14 00

This Rifle, the 40-60 and 45-60 calibres, have been remodeled, and I can recommend them.

The action is simple, and certainly is the quickest Rifle to handle that is made. The shooting qualities cannot be excelled by any arm made. It is now made in five sizes: 32, 38 and 44, 40-60 and 45-60 C. F., and 45-85 Express. Uses same sized cartridge as used in Winchester Rifle.

I have fine finished Rifles at prices ranging from $25 00 to $45 00. Write for description of same.

The 40-60 and 45-60 Rifles are made in standard length of 28-inch. in new and improved frame. Are really a splendid Rifle. Weight 10 lbs., 12 shots. Factory price, $20 50; selling price, $17 50.

ENGLISH AND GERMAN BREECH LOADING GUNS.

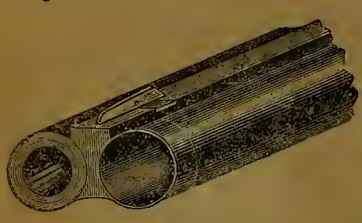
H. Pieper Patent Breech Loading Shot Guns.

This Gun is now well known. The construction and action of it is the best now made. The barrels fit into the breech attachment, which is one solid piece of steel, same as in cut. This being in one piece, insures it against breakage and danger of the barrels spreading apart, as in common guns; also holds the barrels in perfect position, and in connection with the muzzle band, makes it the safest and strongest Gun now made. The barrels are finest bored cylinder and choke bore, and cannot be beaten for shooting qualities.

No. 586. Rebounding Locks, Twist Barrels, Choke or Cylinder Bore. Price for 10 and 12 bores.... $25 00
" 588. Same as 586, but Top Snap. Price for 10 and 12 bores..... 30 00
" 595. Exact representation of above cut, laminated Steel Barrels. Price for 12 bore..... 51 50
Price for 10 bore..... 54 00
" 596. Same as 595, fine Damascus Steel Barrels. Price for 12 bore..... 55 25
Price for 10 bore..... 57 75
" 605. Same as 596, with engraved Locks and Mountings. Price for 12 bore..... 74 00
Price for 10 bore..... 76 50
" 610. Same as 605, extra fine laminated Steel Barrels, engraved Locks and Trimmings, fine finish extra selected Stocks. Price for 12 bore..... 99 25

Breech Loading Rifle and Shot Guns Combined.

In many sections of the country a Gun with one Rifle Barrel and one Shot Barrel is preferred. Made in this way increases the strength, accuracy and penetration, both to the Shot and Rifle Barrel, and makes the best general Gun to be had.



No. 5883. Side Snap Action, best decarbonized blued Steel Barrels, weight 10 to 10½ lbs. In all respects like No. 586, Pieper Gun (see cut).. $33 25
" 5881. Top Snap Action, best decarbonized blued Steel Barrels, weight 10 to 10½ lbs. In all respects like No. 588, Pieper Gun (see cut)..... 39 00
" 5882. Top Snap Action, best decarbonized blued Steel Barrels, weight 10 to 10½ lbs. In all respects like No. 589, Pieper Gun (see cut)..... 46 00
The Shot Barrel is 12 gauge; the Rifle Barrel is 44 cal., using Winchester model '73 C. F. cartridge.

No. 5094. Made by George Fisher. Lefoucheux Action, decarbonized Steel Barrels, weight 10 and 10½ lbs, Pistol Grip Stock; Shot Barrel 12 bore, Rifle Barrel 44 cal., using Winchester model '73 C. F. cartridge..... 22 00

AIR RIFLES.

MARKHAM AIR RIFLE.

Price, with Dart, 500 Rounds Shot and One Ring Target, $1.50.

The greatest Rifle for the price ever known. It shoots common B. B. shot 100 yards. It's the boy's delight and purely a boy's gun; yet men and women are enchanted with it. No powder or caps—no noise—not dangerous to handle. It costs but one cent to shoot 100 times. This gun is splendid for Boys, Girls and Ladies to learn to shoot with. Total length of Rifle, 32 inches; weight, 2 pounds. Has shape and form of Rifle. It can be used indoors as well as out.

To LOAD AND USE THE GUN.—Take the gun by the neck of the stock with the right hand. With the thumb of the left hand unhook the spring to the barrel; break the barrel down till it locks; insert the ball or dart well into the barrel at the breech, and then replace. Never snap off when not loaded. To shoot darts accurately, push the dart beyond the spring in the barrel.

If properly handled, this gun will shoot 100,000 times without repairs. It is the greatest invention ever known in this line, and the greatest attraction out. Everybody is attracted by it, and everybody that likes fun should have one. One boy killed 28 English sparrows in an hour. For rats, mice, cherry birds, toads, snakes, etc., it is just the thing. The trade supplied.

MATCHLESS REPEATING AIR RIFLES.

Shoots sixty-five times at one loading; uses B. B. shot; Blue Barrel, walnut stock, adjustable sights.

Price $2 50

DAISY AIR RIFLES.

All metal, full nickel plated; uses B. B. shot; good shooter $ 2 00

REDUCED PRICE LIST OF RELOADING TOOLS.

For Reloading the following.	Reloader.	Bullet-Mold.	Charge-Cup.	Per Set.
All Pistol sizes, and .32, .38, and .44 Winchester, model 1873	$1 50	$1 10	$0 10	$2 50
All Sporting and Military Cartridges	2 00	1 10	10	3 00
For Express Cartridges	2 00	1 70	10	3 50

Extractor Plugs for Reloaders (any size)	$0 25
Swages, .38 to .44 calibre, for smooth bullets	3 00
Swages, .45 to .58 calibre, for smooth bullets	4 00
Shell-reducing dies	2 00
Die, for New Model Reloader	1 00

In ordering, state what particular cartridge is to be reloaded, as only one size can be reloaded with a single set.

The majority of cartridges require no wads in reloading. For such cartridges as require wads, a wad-cutter will be added to the set at an addition of 50 cents to above prices.

RIFLE and SHOT GUN SUNDRIES.

A GREAT CONVENIENCE TO THOSE WHOSE EYES ARE FAILING.

THE SLOTTERBEK SHOOTING SPECTACLES.

Patented by Chas. Slotterbek, Feb. 3, 1885.

The Simplest, Most Practical and Best Shooting Spectacles Ever Invented.

$2.00 Per Pair.

Indorsed by Capt. A. H. Bogardus and the best and most noted sportsmen on the Pacific Coast, as well as old hunters generally.

Makes Open-Sighted Rifle Shooting More Rapid and Accurate than any Globe or Peep Sight Ever Invented.

HOW TO USE.

When the Rifle is brought to the shoulder and head in proper position to take aim through the sights, the small hole in the diagram, near the letter P, is shaded and has a small hole that acts the part of a peep sight, and is so placed as to come in proper position before the eye, without in any way straining the eye or putting the head in an unnatural position.

In ordering these, if you know the number of the glass you use for reading, send it; if not, give your age, condition of sight, etc. The numbers run 30, 32, 34, 36, 38, 40, 42, 44, 50, 60, 72 and 157. No. 30 is for very old men; No. 157 is for young men with good eyes.

CANVAS AND SPORTING GOODS.

Hunting Coats.

No part of a Hunter's outfit is as necessary as a good Hunting Coat. These coats are made of brown mode duck. Thoroughly well made, with large pockets for carrying game and ammunition. Our Standard Coat is made in several different grades, same general style as cut. This Coat is made double, so that the inside is one large pocket, extending clear around the body. Entrance to same is right opposite to shoulder blades, as shown in cut. Double thickness over shoulders.

No. 0.	Denim cloth, light and strong, making a complete coat for warm weather. Price, each	$ 1 75
No. 1.	Skeleton Coat, 8 oz. duck, sleeveless, made for hot climate, each	2 00
No. 5.	Made of 8 oz. duck, complete like cut, each	2 50
No. 6.	Heavier than No. 5 and better made, each	3 00
No. 7.	Same as No. 6, lined throughout with pliable leather, making it the best Coat to be had for cold-weather shooting, each	9 00
No. 10.	Heavy fine gray 12 oz. canvas, decidedly the best Coat made, each	5 00
No. 11.	Corduroy Hunting Coat, made of the best English Corduroy, well lined and finely made, each	12 00
Any of the above Coats leather bound cost extra each		75

Coats Nos. 5, 6, 7 and 10 have Corduroy Collars.

Cartridge Vests—With Loops.

This takes the place of a Cartridge Belt. It evenly distributes the weight and is decidedly the easiest and most convenient way to carry ammunition.

Price for Vest for Shot Gun Shells	$1 50
" " Rifle "	2 00

These Vests of ordinary size hold 40 shells for Shot Gun.
" " " 50 " Rifle.

They are made strong and good. Either kind contains one watch pocket.

Hunting Hats.

No. 12.	Hunting Cap, double visor, each	$0 50

POLICE EQUIPMENTS.

Daley's Improved Patent Hand-Cuffs.

In placing these Hand-Cuffs on the Market we are confident that a trial of them will convince any officer that they are the best he ever handled.

They are constructed from the best Cast Steel Drop Forgings; every part is made by the finest tools and machinery that can be produced. The reputation which we have gained for superior workmanship in the highest grade of Fire-arms will be fully sustained here, and is a sufficient guarantee of the perfection of work and finish.

These Hand Cuffs can be applied quickly, and when adjusted are automatically double locked and perfectly secure without further handling. Once on the prisoner they cannot be opened without the use of the key.

The bar is notched on both sides (not on top or bottom), and secured by a double lock, so that any effort to pick the lock on one side makes it more secure on the other. The peculiar construction of the key, which has to displace the mate of itself, debars the possibility of anything but a key so constructed opening the lock.

Again, there is no possibility of getting them on the prisoner wrong; backwards or forwards, it is immaterial. The key slot is easy to get at, and in the front, where for the safety of the officer it should be, as he can insert his key and unlock in daylight or dark, without removing his eyes from the prisoner.

The Cuffs are round, and have nowhere any sharp angles or corners; they do not cut or wear the clothes, and are easy to carry in the pocket. The notches do not come in contact with the flesh.

Price per pair, Polished ..... $ 4 00
Price per pair, Nickel Plated 4 75

Tower's Patent Adjuetable Hand-Cuffe.

New Style, Improved Double Lock.

Instantly adjustable to limbs of any size. They can be used in all cases with a certainty that they will fit exactly and securely.

Bean's Pateat Hand-Cuffs, bright polished, per pair 4 00
Nickel plated, per pair 4 75

Bean'e Flexible Police Club.

This club is made of sole leather cut to requlred forms, and brought together under a heavy pressure over elastic steel-spring wire, cemented and riveted, and covered with the same material, securing a perfect surface without break or seam, and very slightly elastic. Over this, to form the handle, a cover is neatly braided. A swivel is secured in the end, through which the strap is passed. It is neat and ornamental, has an easy feeling in the hand by which a firm grip can be taken. It cannot be broken, and will last a lifetime.

10-inch, each ..... $1 75 | 14-inch, each $2 25
12-inch, each ..... 2 00 | 22-inch, each 3 00

Brass Knuckles.

Each 50c

Tower's Perfeot Twisters or Chain Nippers.

Patented July 7, 1874, and April 24, 1883. Made from the best selected stock. Perfectly welded chain. The handles interlock alike from either side. The advantage claimed for this Nipper (or twister) is in the interlocking of the handles. As shown in the cut, when in use, the handles lie one within the other, closing automatically, so as to avoid the play and ahrasion of two handles between the fingers, as in the old forms.

Nickel plated, weight only 3 ozs., each $1 50

Roeewood Police Clube.

14 to 18 inch, each ..... $ 75
22-inch, each 1 00

GUNS REPAIRED.

All kinds of Repair Work done in the best possible manner, with neatness and dispatch. Work done at the lowest possible rates. I pay special attention to this branch of my business and can guarantee first-class work. Duplicate parts for all standard Guns, Rifles and Pistols. When ordering parts please send broken part, if possible, so as to avoid mistakes. When sending Guns for repairs, send the entire Gun, if possible.

I have duplicate parts of all kinds of Fire Arms. Also repair parts for gunsmiths, such as springs, nipples, extra lock guards, wad cutters, round bullet molds, extra parts for loaders, gun sights of all descriptions; also, telescopes, sights and fittings.

DIRECTIONS FOR SENDING FOR ARTICLES AND CATALOGUE.

In sending orders, write your name, town, county and State plainly and distinctly; also, your Postoffice address. Neglect heading your letters "Grub Gulch," "Sampson's Ranch," and all such fictitious names that have no Postoffice, as the Postoffice authorities will not recognize these names and letters come back to us constantly, and many times it is very difficult to trace them.

Another thing: Parties writing letters will write the whole letter plainly and distinctly, and when they come to sign their name will run it all into a lump and we have to guess at it.

In all cases our goods are cash. We must decline to give credit unless parties are in business. Where parties in business wish to open an account they should give refereuces in their correspondence. For any amount less than Five Dollars we cannot open a new account, unless a continuation of trade is expected.

In ordering small articles, where it is inconvenient to purchase Postoffice order, Wells-Fargo order or to send check, for any amount under Five Dollars we will accept postage stamps for same as cash. Two-cent stamps are preferred at all times, though 5's and 10's in limited quantities will be accepted.

Certain articles, such as Gun parts, Pistols, Cutlery and certain kinds of Fishing Tackle, can be sent by mail quickly, safely and at very small cost. In this case it is desirable to have them registered, which costs ten cents extra on each package. Cartridges, Powder, Caps or explosives of any kind cannot be sent by mail in any case. Also, Powder cannot be sent by express in any case, so neglect ordering a pound here and there to be sent with odd packages, as there is a fine of five hundred dollars attached to each offeuse when shipped under another name.

Postage on merchandise is one cent per ounce or fraction thereof. Packages are limited in weight to sixty-four ounces.

TAXIDERMISTS' SUPPLIES.

C. D. LADD'S PRICE LIST FOR FURS

FOR PRESENT TIME.

The FUR TRADE is one that fluctuates so largely that it is a difficult thing to make quotations that do not vary, as Furs are subject to the whims of fashion; and what sells readily now, next Fall, perhaps, the fashion changes, and it cannot be sold at any price.

There are some staple articles, however, which are exceptions to this rule, namely: Sea Otter, Siberian Sable, Fine Beaver, Land Otter, Silver Gray Fox and Seal. These have a standard value at all times, fluctuating somewhat, according to the quantity taken and the condition of the Winter weather throughout the world, which also has a great deal to do with the prices of common Furs. The years of '89 and '90 were poor years for the sale of common Furs, and the price of Coon, Wild Cat, Mink and Marten declined largely, and most all shippers lost heavily. The present outlook for these common Furs is somewhat improved, and this has advanced the higher priced Furs in proportion. I am prepared at all times to pay the highest possible prices for Furs, and solicit consignments from you of same.

DIRECTIONS FOR SENDING FURS.—Light Furs send by express; and when you have only a few and they are valuable, you can send them by mail at 1 cent an ounce postage. This is an easy and safe way to send Marten, Mink, Fisher and Silver Gray Foxes. Heavy skins, like Bear, Beaver and Coon, can be sent by freight, it being the cheapest way. Mark—C. D. LADD, San Francisco; also mark on the tag your name, town and State. At the same time send me a note informing me how shipped and when; also the exact number and kind contained in the package. As soon as received, I will send you a check for full value of same, giving at the same time the different grades and values.

While trapping and collecting skins, bear in mind that large No. 1 Prime Skins bring a good price, as it costs no more to dress a good skin than it does a poor one, and when dressed it can be sold. Hence, small and Summer Skins have value only in proportion to the quality of Fur, and also to the size of the skins.

Trusting to receive consignments from you in due time, I remain yours truly,

C. D. LADD, 529-531 Kearny Street, San Francisco, Cal.

N. B.—Dry and Green Hides, Sheep Skins, Wool and Goat Skins, I do not make a specialty of, but when received will sell for you at best possible advantage, charging 5 per cent. commission on the sale.

FURTHER DIRECTIONS IN REGARD TO FURS.

Beaver Skins when stretched this way bring best prices. Never dry Beaver in the sun, as they burn very easy.

This cut represents Skunk Skin, cased.

This cut represents Coon Skin, cased.

This cut represents Fox Skin, cased.

N. B.—I find that a great many Furs come to me almost valueless on account of being badly handled. Fox, Coon, Cat, Mink, Marten, Fisher, Land Otter, Wolves, Coyote and Skunk must be cased in order to bring good prices; they want to be skinned whole and stretched like the cuts. The cut of the Fox Skin is a nice pattern. Mink, Marten, Fisher and Land Otter want to be made narrower in proportion to length.

In skinning, cut at the rump right across the hind legs inside, close to the tail. Turn the skin inside out, drawing over the body, leave the ears and eyes perfect, as represented; split the tail, so it will dry well; then shape a board the shape of the cut, draw the skin over the board, flesh side out, draw down and tack each leg first, then tack the center of back, drawing it down as much as possible. To stretch it still more, insert a cleat in the belly, draw down and tack same, so that it will be as long as the back; then tack on each side of the tail to make the skin square and good shape; hang in a warm dry-room—do not dry in the sun nor use salt in drying—remove the surplus fat and flesh, but do not scrape it clean. As soon as the skin sets, which will be from six to ten hours, turn it fur side out; replace the board to shape it well; let it hang until thoroughly dry. Skin the animal as soon as killed, if possible.

By following these directions, your Furs will bring much more than when they come cut open in the belly and all shriveled up, and not properly stretched and dried. The Fur comes off when they are dressed and the skin is valueless; they are then called burnt skins. California and Oregon Bear when killed in the Summer are not worth anything—they will not pay for freight. Pole Cats, Ring Tail Cats and Gray Squirrels are not worth anything. Furs on this Coast ought not to be caught before November 1st, and not later than 1st of March, except Beaver, which can be killed as late as May 1st on the mountain streams. Bear, Coyote and California Lion should always have their heads skinned, leaving the ears, eyes and nose perfect, also claws when possible, as these are used largely for rugs and mats, and we want them perfect as possible. Correspondence solicited in regard to Furs and Skins of all descriptions.

I am also prepared to dress or tan all kinds of Raw Furs with neatness and dispatch at the following prices:

Coon, Wild Cat and Gray Fox	$ 40 each	Bear, Black	from $2 50 to 5 00 each
Red Fox, Cross Fox and Silver Fox	50 "	Bear, Brown and Grizzly	" 3 00 " 7 00 "
Coyotes	1 00 "	Beaver, nicely plucked	1 50 "
Large Timber Wolves	1 50 "	Land Otter, nicely plucked	1 50 "
California Lion	2 50 "	Mink and Marten	30 "
Skunk			40 "

I also have in stock and manufacture any of the above and other lines of Furs made into Mats and Rugs. [illegible] Robes, when wanted. Prices for mounting as follows:

Fox (including dressing and tanning, with half head and eyes, life size, nicely lined, double border)	$3 00 each		
[illegible] as above	$4 00 each	Bear, Black, same as above	from $9 00 to 14 00 "
[illegible], same as above	7 50 "	Bear, Brown & Grizzly, "	from 9 00 to 18 00 "

Prices for making of Buggy Robes from any of the above Furs furnished on application.

PRICE LIST NEWHOUSE'S GENUINE STEEL TRAPS.

Steel Traps are something of which almost everyone in the country needs a few; besides quite a sum of money can be obtained by saving the skins of Coons, Skunks, Foxes, etc., that are caught with them. Coons, Skunks, Fishers and Minks are caught easily. The best way to catch them is by drawing a piece of meat over the grass where they are in the habit of passing. A Trap should be set every 400 or 500 yards. The most common way is to hang a piece of meat about 15 inches from the ground, almost over the Trap, cover the Trap carefully with leaves or grass; do not make the ground smooth, but leave it natural, and handle the Trap as little as possible.

Foxes, Coyotes, Otters and Beavers are more difficult to catch, being very sensitive about the scent of a person. The best way to catch them is by setting the Trap in water, as they will not step on anything that has been handled. In order to catch them easily, find a small stream of running water, dig out a space about 4 or 5 feet wide, place 15 inches from one side a small tuft of grass; on this place your bait, covering it over as though it had been partly buried by some animal. On the side nearest to the tuft set your Trap. Have the water just cover it. On the pan of the Trap put a tuft of grass so that the jaws will pass over it. Cover the Trap well with mud, grass and leaves, but not too deep, and it should be set in running water, if possible. When the Fox or Coyote finds the bait he will not step into the water, but will put his foot on the tuft and reach out for the bait. This is a sure way to catch all kinds of sly animals, and also catches Mink, Fisher, Coon and Skunk equally as well. To attract them the scent of Skunk or Beaver is used to good advantage. A small box is very convenient to use in setting Traps this way.

No. 0	Rat Trap.	Spread of jaws, 3½ inches. Price per dozen, with chain	$ 4 25
" 1	Trap.	Spread of jaws, 4 inches; for Mink and Marten. Price per dozen, with chain	4 65
